- State / Federal Reporting
- Dredging
- Land Permitting
- Consulting Services
- Belt Pressing
- Digester and Lagoon Cleaning
- Off-Site Biosolids Storage
- Marketing and Distribution Programs

INDY DISPOSAL SOLUTIONS

Disposal Fees

Septage, Greywater, Biosolids, Water Treatment Plant Sludge

Prices at IDS are volume derived based on the gallons hauled to IDS from January through December each year. The discounts occur when the levels are achieved and are not retroactive to previous gallons. The pricing structure for septage, greywater, biosolids, and water treatment plant sludge are as follows (*assuming the discharge limits are met*):

0 – 250,000 gallons annually (January 1 – December 31)	\$.082 / gallon
251,000 – 500,000 gallons annually	\$.081 / gallon
501,000 – 750,000 gallons annually	\$.08 / gallon
751,000 or more gallons annually	\$.079 / gallon

For example, if XYZ Hauling hauls 225,000 gallons to the **Merrell Bros. IDS facility** during 2010, they will be charged at \$.082 for each gallon, having a total invoice of \$18,450.00.

If XYZ Hauling brings in 675,000 gallons during 2010, their charges will be as follows:

250,000 gallons at \$.082 (\$20,500)	} Average price = \$.081 / gallon
250,000 gallons at \$.081 (\$20,250)	
175,000 gallons at \$.08 (\$14,000)	

Grease Trap Waste

Cost for Disposal of Grease Trap Waste:	\$.26 / gallon
